Mumbai, Maharashtra | sumit.yadav.0287@gmail.com | +91 8591284360 | sumity88.in | linkedin.com/in/sumit-yadav-ab538b321/ | github.com/Sumit-y88

PROFESSIONAL SUMMARY

Computer Engineering student at Thakur College of Engineering and Technology (CGPA: 9.81) with hands-on experience in full-stack web development using the MERN stack. Skilled in building scalable applications including real-time chat systems, AI-powered tools, and secure credential managers. Strong foundation in REST APIs, JWT authentication, and database design with a passion for clean backend architecture. Adept at translating complex requirements into efficient, maintainable code with a strong grasp of data structures and algorithms. Actively contributing to technical communities and seeking opportunities to build impactful products in a collaborative, fast-paced environment.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Servlet, JSP

Frontend: React.js, Tailwind CSS, GSAP, Swiper.js

Database: MySQL, MongoDB

Cloud & DevOps: Git, GitHub, Vite, Postman, Vercel, Render

PROFESSIONAL EXPERIENCE

Working Committee Member | Computer Society of India (CSI) Thakur College of Engineering and Technology, Mumbai | 2025 – Present

- Organized technical events, workshops, and coding competitions, increasing student participation in technology-focused activities.
- Managed end-to-end event planning including registrations, logistics, and knowledge-sharing seminars for the college tech community.

PROJECTS

Infra-Chat | Node.js, Express.js, React.js, MongoDB, Socket.IO, JWT

- Built a scalable real-time chat platform with instant messaging and file sharing using Socket.IO enabling communication between multiple users simultaneously.
- Implemented JWT-based authentication with role-based access control to secure user routes and protect API endpoints.
- Integrated MongoDB to persistently store user data, chat rooms, and messages with an optimized backend using Node.js and [Express.js](#).

GitHub: <https://github.com/Sumit-y88/Infra-Chat>

FormFlow | React.js, Node.js, WebSockets, MongoDB, Tailwind CSS

- Developed a collaborative form builder with real-time live cursors using WebSockets and node-graph conditional logic for dynamic field branching.
- Implemented version history with full undo/redo support and dynamic theming with 4 presets and custom CSS for personalized form design.

GitHub: <https://github.com/arjunrhetoric/formflow>

JobTrackr | React.js, Node.js, Express.js, MongoDB, Anthropic API

- Built an AI-powered job application tracker to manage and monitor the entire job search pipeline with status tracking and dashboard UI.
- Integrated Anthropic API to automatically generate tailored cover letters based on job descriptions reducing manual effort significantly.

GitHub: <https://github.com/Sumit-y88/Ai-job-tracker>

Password Manager | MongoDB, Express.js, React.js, Node.js, JWT

- Built a secure full-stack MERN application for storing and managing user credentials with JWT-based authentication and encrypted MongoDB storage.
- Created full CRUD REST APIs for adding, updating, and deleting passwords with a responsive React.js and Tailwind CSS interface.

EDUCATION

B.E. in Computer Engineering | Thakur College of Engineering and Technology | CGPA: 9.81/10.0 | Expected: May 2026

- Coursework:** DSA, DBMS, Operating Systems, OOP, Software Engineering
- Achievements:** Top 10% of department | Top 10 out of 80 teams at Recode Hackathon | CSI Working Committee Member
